## PROFILE

---

IT support analyst turned quirky full-stack developer graduate. Trained with the latest technologies with extensive background in Javascript and adept at developing responsive mobile applications, and websites from the ground up. Detail-oriented mindset with 3+ years of experience in the tech industry.

Seeking a long term position with an organisation that provides an ambiance where I can enhance my technical and personal skills and utilise them to benefit the company.

## TECHNICAL EXPERTISE

---

- JavaScript ES5, ES6
- React, React-Native
- Git/Github
- TDD with Jest and Supertest
- MVC
- React-Router
- Bootstrap, CSS, HTML
- Front-end libraries and frameworks (Bootstrap, Materialize and more).

## PROFESSIONAL EXPERIENCE

---

### NorthCoders: Jan 2021-April 2021

Full-Stack Developer Student

A 14-week Full stack remote bootcamp, teaching a practical and industry-led curriculum.

### Projects

#### Connect News

A fully responsive Fullstack Reddit-style news board where users can vote and comment on different articles. RESTful API built with Node.js, SQL and Express.js. Frontend built with React.js, React-Bootstrap.

Front-End: <https://github.com/Nadia770/Connect-news>

Back-End: <https://github.com/Nadia770/Connect-news-be>

#### Thandem

Collaborated as a group and created a cross platform mobile app for cyclists to easily create or join an event and meet new cycling friends. Thandem supports integration with Strava, making it easy for users to import past activities to create new adventures. Built using React Native, Axios, Express server, Postgres DB, Knex.

<https://github.com/hanlacey/tandem-fe>

#### Weather App

A weather forecast app created with Reactjs. The app API calls from OpenWeatherMap and displays current weather information for different cities. Built with React, CSS and axios to fetch data from OpenWeatherMap.
